## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-8, 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite. Claims 3-8 are drawn to a computer program but the body of the claims do not further limit the 'program'. The limitations recited in claims 3-8 are drawn the intended use of the program and the means for using the program but are not limiting to the program.

Furthermore, the claims are very unclear. Cls. 3 & 6, what is a 'computer usable medium'? How does it 'enable a user'? What 'controls' the process? The user or program? 'The process' lacks proper antecedence. What uses a 'wheel dressing roller'? What is a template? Value receptacle? Cl. 4, what is 'the value'? The tolerances? Cl. 7, transferring the value where? What do the '???' mean? Cl. 11, how does a system 'construct' a computer program? What are screen forms? 'The motions' lack antecedence. The computer program 'obtains data', but the system 'also compiles data'. This is unclear. 'The grinding machine' lacks antecedence. What is a 'program screen form'? 'Value receptacle'? How does it 'relate'? 'The process of grinding'

lacks antecedence. How does the system 'compile' the computer program? Doesn't it compile 'data'? What does 'to a state' mean? How is a program 'understood' by a grinding apparatus?

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 3-8,11, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Maack-5,766,057.

Maack discloses a centerless grinding machine with wheel dressers, wherein the dressing process is carried out by a CNC or PLC (15) which has input means, display means, and compilation means for carrying out intended program.
